

In the claims

Please add the following claims:

Sub C4
B1
29. A computer program product comprising computer useable medium having computer readable program code to:

- a) provide a page-creating remote user with means to create a personal page having personal information;
- b) store attributes representing the personal information in the page-creating remote user's personal page in one or more databases;
- c) provide the page-creating remote user with means to select other remote users to allow those other remote users access to the personal page;
- d) provide the page-creating remote user with means to input security parameters for the personal page, the security parameters specifying authorization of at least one other selected remote user to view the personal page; and
- e) store the security parameters in one or more databases.

30. The computer program product of claim 29, wherein the personal page having personal information includes graphical information.

31. The computer program product of claim 29, wherein the means to select other remote users includes means for searching user profiles including personal information for other remote users.

Sub C5
32. In a networked computer system, a system for providing a personal page comprising:
